

TEMPERATURE

Temperature is usually measured in degrees Celsius ($^{\circ}\text{C}$).

! It is measuring how hot or cold the air temperature is in the room.

15-25 $^{\circ}\text{C}$ is a normal range, depending on the time of year and whether the heating is on!

it is affected by the weather

it is affected by our home, e.g. heating, insulation, windows open etc.

! TOO HOT OR TOO COLD? !

! IF < 15 AND you are in the house: put the heating on! ← protect people

IF < 5 : put the heating on! ← protect your house

IF > 25 : close the curtains to keep out the sun (and go to get an ice lolly!)
